  {
    "question": "What is GREEN Limited?",
    "answer": "GREEN Limited is a leading renewable energy solutions provider in Papua New Guinea, committed to sustainable living and empowering communities through clean energy technologies."
  },
  {
    "question": "Where does GREEN Limited operate?",
    "answer": "GREEN Limited operates globally with offices in Papua New Guinea, USA, Australia, Singapore, and India."
  },
  {
    "question": "What is GREEN Limited’s mission?",
    "answer": "Its mission is to deliver energy autonomy, empower rural communities, and support sustainable economic and social growth."
  },
  {
    "question": "What does GREEN stand for?",
    "answer": "GREEN stands for providing clean, renewable energy solutions and promoting a sustainable future for communities."
  },
  {
    "question": "When was GREEN Limited founded?",
    "answer": "GREEN Limited was founded in 2007."
  },
  {
    "question": "What makes GREEN Limited unique?",
    "answer": "It combines global expertise with local knowledge to provide world-class, ISO 9001-certified renewable energy solutions tailored for Papua New Guinea."
  },
  {
    "question": "What industries does GREEN Limited serve?",
    "answer": "GREEN serves healthcare, education, agriculture, telecom, hospitality, and rural communities with renewable energy solutions."
  },
  {
    "question": "What are GREEN Limited’s key services?",
    "answer": "Its services include Engineering, Procurement, Construction, and Operations & Maintenance of renewable energy systems."
  },
  {
    "question": "What type of renewable energy solutions does GREEN provide?",
```

```
  "answer": "GREEN provides solar off-grid, on-grid, hybrid systems combining solar, windmill, and micro-hydro power technologies."
 },
 {
  "question": "What are the benefits of GREEN’s solutions?",
  "answer": "They reduce dependency on conventional power, lower carbon emissions, and empower rural communities socially and economically."
 },
 {
  "question": "What is Energy Autonomy?",
  "answer": "Energy Autonomy refers to GREEN’s mission to make communities self-reliant by providing independent, renewable power solutions."
 },
 {
  "question": "Does GREEN focus on rural electrification?",
  "answer": "Yes, its primary focus is electrifying rural areas that lack reliable power, enabling sustainable growth and better living conditions."
 },
 {
  "question": "What is GREEN Limited’s headquarters location?",
  "answer": "Its headquarters is located in Port Moresby, National Capital District, Papua New Guinea."
 },
 {
  "question": "Where is GREEN Limited’s UK office?",
  "answer": "UK office: 111A High Street, Wealdstone, Harrow, Middlesex, HA3 5DL, London."
 },
 {
  "question": "Where is GREEN Limited’s India office?",
  "answer": "India office: 194E-404, Gurusamy Nagar, Thanneer Panthal, Coimbatore, Tamilnadu - 641 004."
 },
 {
  "question": "Where is GREEN Limited’s Singapore office?",
  "answer": "Singapore office: 8 Burn Road, #07-07, TRIVEX, Singapore 369977."
 },
 {
  "question": "Where is GREEN Limited’s Australia office?",
  "answer": "Australia office: Level 36 Riparian Plaza, 71 Eagle Street, Brisbane QLD 4000."
 },
 {
  "question": "What certifications does GREEN Limited hold?",
```

```
  "answer": "It holds ISO 9001 certification, ensuring international quality and management standards."
 },
 {
  "question": "How many employees does GREEN Limited have?",
  "answer": "GREEN Limited has around 11-50 employees, with 21 members listed on LinkedIn."
 },
 {
  "question": "What are GREEN’s specialties?",
  "answer": "Specialties include solar, windmill, micro-hydro power, rural electrification, and powering healthcare, education, and agriculture."
 },
 {
  "question": "How does GREEN ensure quality?",
  "answer": "By performing all phases of solar services in-house, maintaining strict control over safety, quality, and timelines."
 },
 {
  "question": "What is GREEN’s approach to sustainability?",
  "answer": "GREEN integrates climate-conscious solutions, environment-friendly systems, and net-zero targets into its projects."
 },
 {
  "question": "How does GREEN contribute to healthcare?",
  "answer": "It powers healthcare facilities with renewable energy, ensuring reliable electricity for critical medical operations."
 },
 {
  "question": "How does GREEN contribute to education?",
  "answer": "GREEN provides energy solutions for schools, enabling digital learning and better educational infrastructure."
 },
 {
  "question": "How does GREEN contribute to agriculture?",
  "answer": "It powers irrigation systems and cold storage facilities, supporting farmers and food security."
 },
 {
  "question": "What is client value engineering?",
  "answer": "It is GREEN’s approach of delivering customizable, efficient, and cost-effective renewable energy solutions tailored to client needs."
 },
 {
```

```
  "question": "Does GREEN provide operations and maintenance services?",
  "answer": "Yes, it provides ongoing O&M services to ensure optimal performance of installed systems."
 },
 {
  "question": "What is GREEN’s target audience?",
  "answer": "Communities, institutions, and businesses in rural and off-grid regions seeking sustainable power solutions."
 },
 {
  "question": "What is GREEN’s website?",
  "answer": "GREEN’s official website is https://www.green.com.pg"
 },
 {
  "question": "How can I contact GREEN Limited?",
  "answer": "You can contact GREEN by phone at +67572010222 or via their website contact form."
 },
 {
  "question": "What type of projects has GREEN completed?",
  "answer": "GREEN has delivered projects in rural electrification, solar power plants, hybrid systems, and community power solutions."
 },
 {
  "question": "Does GREEN work with governments?",
  "answer": "Yes, GREEN partners with governments and NGOs to deliver large-scale rural electrification projects."
 },
 {
  "question": "Does GREEN work with businesses?",
  "answer": "Yes, GREEN provides tailored energy solutions for industries like telecom, hospitality, and agriculture."
 },
 {
  "question": "What are hybrid power systems?",
  "answer": "Hybrid power systems combine solar, wind, micro-hydro, and sometimes grid power to provide reliable energy."
 },
 {
  "question": "What is GREEN’s role in achieving net-zero targets?",
  "answer": "GREEN’s solutions reduce carbon emissions and promote renewable energy adoption, supporting net-zero goals."
 },
 {
```

```
  "question": "Does GREEN offer solar off-grid systems?",
  "answer": "Yes, GREEN designs and installs off-grid solar systems for remote areas without electricity access."
 },
 {
  "question": "Does GREEN offer on-grid solar solutions?",
  "answer": "Yes, GREEN also provides on-grid solar solutions that connect to the national grid."
 },
 {
  "question": "Does GREEN offer micro-hydro solutions?",
  "answer": "Yes, micro-hydro solutions are part of its portfolio, ideal for water-rich rural areas."
 },
 {
  "question": "Does GREEN offer wind energy solutions?",
  "answer": "Yes, GREEN offers windmill power solutions as part of its hybrid energy systems."
 },
 {
  "question": "What is the company’s philosophy?",
  "answer": "GREEN’s philosophy is to be of value rather than just a success, focusing on delivering positive impact."
 },
 {
  "question": "What social impact does GREEN create?",
  "answer": "It promotes education, healthcare, and economic development by providing reliable electricity to underserved regions."
 },
 {
  "question": "What environmental impact does GREEN create?",
  "answer": "It reduces fossil fuel dependency, lowers greenhouse gas emissions, and supports eco-friendly development."
 },
 {
  "question": "Does GREEN provide consulting services?",
  "answer": "Yes, GREEN provides expert consulting for renewable energy project planning and implementation."
 },
 {
  "question": "What is GREEN’s business model?",
  "answer": "GREEN focuses on project design, engineering, procurement, construction, and ongoing maintenance of energy systems."
 },
```

```
 {
   "question": "Does GREEN comply with international standards?",
   "answer": "Yes, it follows international standards and quality management systems, proven by ISO 9001 certification."
 },
 {
   "question": "Does GREEN provide training or workshops?",
   "answer": "Yes, GREEN may provide training for local technicians and community members to manage systems."
 },
 {
   "question": "Does GREEN partner with NGOs?",
   "answer": "Yes, GREEN partners with NGOs for rural development and electrification initiatives."
 },
 {
   "question": "Can businesses collaborate with GREEN for CSR projects?",
   "answer": "Yes, businesses can collaborate with GREEN for corporate social responsibility projects focused on sustainability."
 },
 {
   "question": "How does GREEN ensure safety in projects?",
   "answer": "Safety is maintained by controlling all project phases in-house, following strict safety protocols."
 },
 {
   "question": "Does GREEN offer customized solutions?",
   "answer": "Yes, GREEN delivers fully customizable energy solutions based on client requirements and local conditions."
